Get your Cyber Essentials certification faster with our Aegis platform

- Delays in achieving compliance costs money. Aegis' automation takes on the heavy lifting associated with Cyber Essentials and gets you there faster, while tracking progress in real time.

- From evidence collection to security update management and user access control, its time to accelerate and simplify Cyber Essentials.

- Aegis covers over 20 info sec standards including SOC 2, PCI-DSS, DORA, and NIST.

Clients will likely ask to see Cyber Essentials credentials before doing business.

34% of organisations have reported losing business due to missing certifications.

Move from manual checkbox to automated and continuous compliance.

Aegis automatically cross-references relevant controls already in place for other standards that can be used for Cyber Essentials.

Store and share evidence and documentation with your teams, customers, and auditors.

> " We needed Cyber Essentials to bid on government contacts, but didn't know where to start. Aegis helped lay everything out for us and having access to a vCISO accelerated the process. It was definitely money well spent, and our success rate for RFP's has improved.

vambrace

Our vCISO expertise simplifies the Cyber Essentials certification process

All Aegis clients are assigned their own Virtual CISO (vCISO) as standard. This experienced cybersecurity and compliance leader will be the main point of contact throughout our relationship, and will lead the Cyber Essentials certification process.

Aegis is preparing you for continual success from day one

A Cyber Essentials certification is valid for one year. Thanks to Aegis' continuous monitoring, gaps that open are immediately flagged, along with the reasons why, and a step-by step guide to aid remediation.

This means come renewal, your team are prepared for a swift, cost-effective re- certification.

Reduce the risk of a data breach

To achieve Cyber Essentials, your vCISO will help you demonstrate strong information security practices across:

- Secure configuration
- Malware protection
- User access controls
- Firewall management
- Security update / patch management

According to the impact evaluation on gov.uk, 89% of organisations recommend Cyber Essentials as a vital step towards protecting against common cyber threats.

34% of organisations have reported losing business due to a missing certification like Cyber Essentials

Get yours from as little as £499*
