# A faster, clearer, and simpler view of operations

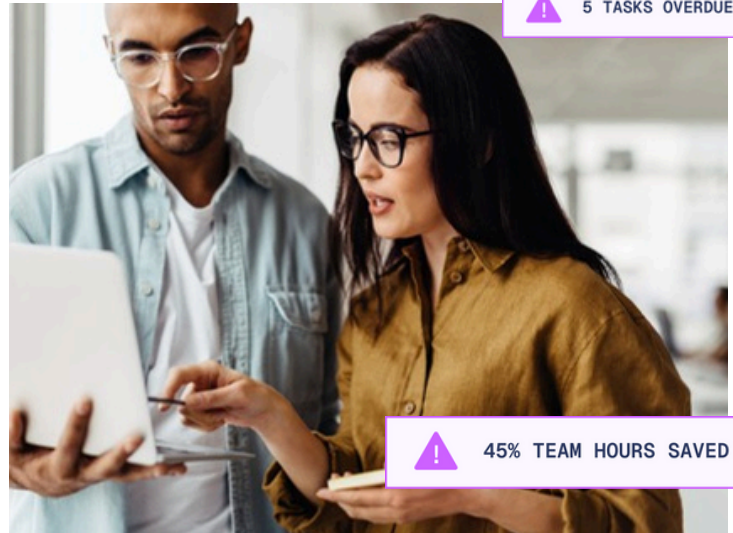

As regulatory complexity and scope continues to increase, Aegis helps organisations close gaps and achieve their ongoing risk management and compliance goals fast.

We will move you away from manual and inefficient processes, analysis, and reporting and towards automation and real time visibility to return up to 50% of your compliance teams' time.

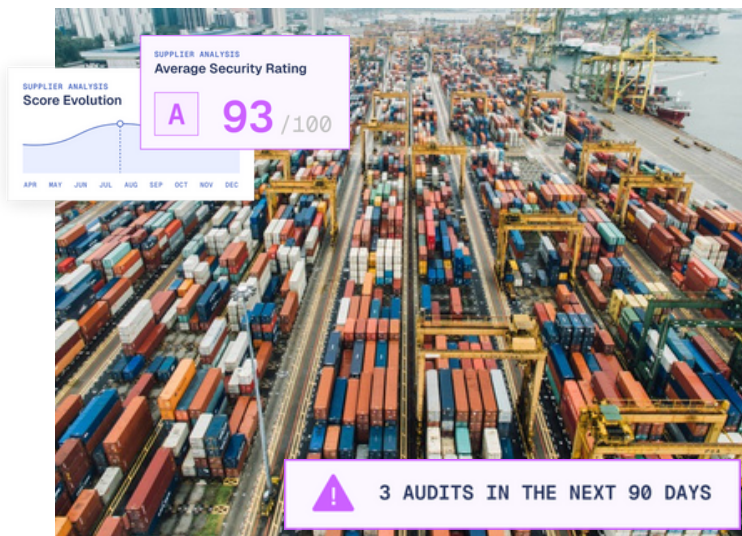

Scale risk and compliance programs without the pain. Aegis continuously monitors your key suppliers and accelerates the compliance process against over 20 information security standards and frameworks including...

! 5 TASKS OVERDUE

! 45% TEAM HOURS SAVED

This is important because 34% of organisations have reported losing business due to a missing certification.

- See up to a 3 x ROI and payback period from just 3 months
- Move from periodical to continuous compliance and risk management

“

Nick collaborated with us to develop a comprehensive ISO 27001 company policy, ultimately leading to a successful audit. More recently, we partnered with Nick again to complete an ISO 27001:2022 gap analysis, helping us identify the necessary changes for the new standard, ensuring we're prepared for our upcoming re-certification.
