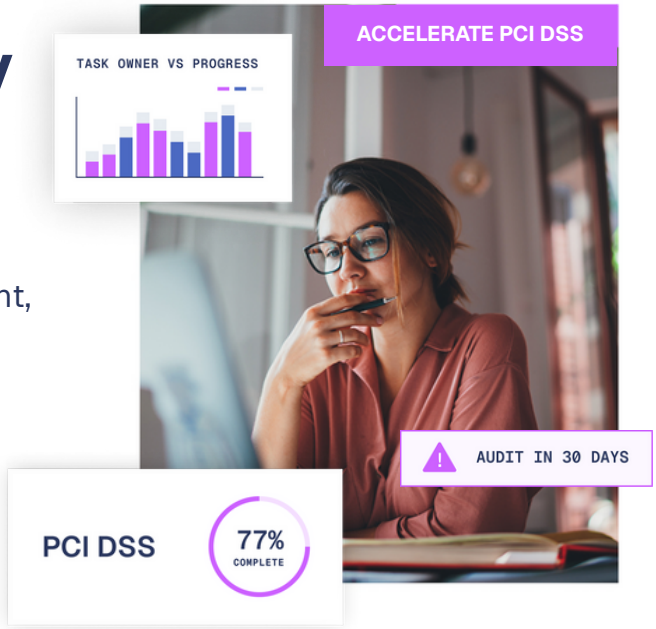
Accelerate and Simplify PCI DSS Compliance



- Automate evidence gathering, task management, and progress tracking for PCI DSS
- Aegis helps and guides teams at every stage, while returning up to 50% of their time
- Run PCI DSS specific gap assessments to quickly pinpoint control failures

What you can expect from Vambrace

A full, fast, and automated PCI DSS service that starts with mapping your validation requirements before conducting an automated gap analysis against PCI DSS v4.0.1 to pinpoint if or where your organisation is falling short.

Get PCI DSS compliant fast with our Aegis platform

- Some organisations only think about compliance once a year, resulting in rushed, error strewn, and incomplete PCI DSS documentation just before the audit is due.
- Aegis moves you to continuous compliance, so your team are ahead of the game, ready for a swift, cost-effective, re-certification that has zero impact on operations.
- Aegis covers over 20 info sec standards including Cyber Essentials, ISO 27001, DORA, GDPR, and NIST.

Clients and prospects will likely ask to see PCI DSS credentials before doing business.

Generate PCI DSS specific gap assessments to quickly pinpoint control failures.

Automate policy generation for controls including access and encryption.

Your audit-ready documentation is automatically collected and organised.

Share and create scalable workflows and assign tasks to team members.

> “Anytime I’ve had a query the guys have been fantastic at getting back to me and are all over it straight away.

Our expertise and A-LIGN partnership simplifies the PCI DSS process

All Aegis clients are assigned their own Virtual CISO (vCISO) as standard. This experienced cybersecurity and compliance leader will be the main point of contact throughout our relationship, and will lead the PCI DSS certification process.

Automate and streamline PCI DSS compliance at scale

The worst case scenario is for new issues to surface just before your audit because of a lack of visibility.

Aegis provides immediate alerting to new and evolving gaps and inconsistencies that could impact PCI DSS compliance thanks to powerful AI driven automation and continuous monitoring.

Strengthen your data security

PCI DSS is all about improving the way organisations store, process, and transmit sensitive payment and customer data.

PCI DSS supports your wider risk management strategy, aligning with other compliance frameworks such as NIST and GDPR.

Accelerating your audit and certification

As part of our full service, you will be seamlessly introduced to our partners at A-LIGN, where their experienced QSAs will conduct your audit and formally award your PCI DSS Report on Compliance (ROC) and Attestation of Compliance (AOC). A-LIGN have conducted over 2,000 PCI assessments over more than 20 years, with a 96% satisfaction rating. To learn more visit **www.a-lign.com**

“

A-LIGN has been an asset as we navigate PCI DSS, and SOC 2, helping and guiding us through the process. The various people with which we’ve worked have been incredibly knowledgeable and capable.
