Our vCISO expertise simplifies the SOC 2 certification process

All Aegis clients are assigned their own Virtual CISO (vCISO) as standard. This experienced cybersecurity and compliance leader will be the main point of contact throughout our relationship, and will lead the SOC 2 certification process.

Get a head start with pre-written policies

Aegis contains a comprehensive library of pre-written policies that are mapped to SOC 2, eliminating the need to author them from scratch.

Covering the five trust services criteria: Security, Availability, Processing Integrity, Confidentiality, and Privacy, these templates establish a clear and error free auditable control environment.

Reduce the risk of a data breach

The issuing of your SOC 2 report demonstrates the implementation and maintenance of strong information security practices.

Your vCISO will work with your team to implement the Security Trust Criterion, which is required for all SOC 2 reports.

Once issued, your SOC 2 report can be shared with clients, auditors, and regulators via the Aegis Evidence Hub.

Accelerating your audit and certification

Your SOC 2 audit and certification award will be handled by our partners at A-LIGN. They possess over 20 years' experience and are a leader in security compliance audits, serving companies of all sizes. As the #1 issuer of SOC 2 reports worldwide, A-LIGN has helped over 17,000 organisations meet their SOC 2 certification and re-certification needs. To learn more visit www.a-lign.com

“

A-LIGN's ability to complete SOC 2 Type II and ISO 27001 at the same time was very helpful. Combined meeting and portal response times were excellent, reducing time wastage for our team.
