

# Automate and simplify Third Party Risk Management | TPRM

- ✓ Continuously monitor for emerging risks across your supply chain that could impact you
- ✓ Help and guide teams with TPRM. Advanced automation returns up to 50% of their time
- ✓ Enable real-time, not point-in time monitoring of the security status of suppliers

## Automate and scale third party risk management without pain

Our Aegis platform unifies real-time data, assessments, and threat monitoring to deliver a continuous 360-degree view of third party risk. Onboarding suppliers is easy, while powerful automation assesses them against key security standards or your own custom questionnaires.

### Welcome to the Aegis Platform

### How leading organisations manage their third party risks

- Prioritise monitoring and alerting of high risk vendors and make confident decisions based on real-time data.
- Get insights into your key suppliers and their gaps against over 20 information security frameworks including ISO 27001, and SOC 2.
- Aegis will automatically detect incidents that change a key suppliers' risk profile and instantly alert your team.

Speed up your supplier questionnaire creation and responses with AI powered automation.

Identify your supplier risks that pose the greatest threat to you in real time, not point in time.

Work with suppliers to remediate vulnerabilities and close the compliance gaps Aegis surfaces.

Discover how the Aegis platform automates and simplifies every aspect of TPRM.
