

# Our experienced and trusted vCISO service

- ✓ Access elite information security and risk management leadership for your organisation
- ✓ Remove the risk of an expensive full-time hire
- ✓ Your vCISO will be ready to start and make an impact immediately

## The role of a Vambrace vCISO

A Vambrace vCISO is a highly experienced and impartial information security professional who will become an integral part of your team. Available immediately, they will drive board level engagement on cybersecurity matters, and execute strategies informed by leveraging the power of Aegis, our automated cybersecurity compliance and risk management platform.

### Strategic and operational cybersecurity wins with a Vambrace vCISO

- With Aegis, our automated compliance and risk management platform, access to a vCISO is included in your subscription as standard.
- Full time CISOs are expensive and hard to find. Compensation can exceed £170,000, far exceeding the budgets or appetites of organisations who do not need this expertise for 40 hours a week.
- A vCISO is ideal for new projects like ISO 27001, or seamless cover for maternity, paternity, or extended holidays.

Your vCISO will support you with over 20 info sec standards including ISO 27001, PCI DSS, NIST CSF, and SOC 2.

They will create and test incident response plans so when they are needed your people and processes are ready.

A big part of their role is to ensure the personal development of your own team from their experienced coaching and mentorship.

They will be your experienced and impartial board level voice that clearly communicate cybersecurity issues.

Nick has vast experience and it shows. I couldn't think of a better person to have in your corner for navigating ISO 27001.

# A vCISO for any type of business

## vCISO services for: startups

When the focus is winning new business and reaching critical milestones fast, you cannot afford setbacks or lost deals due to basic compliance failings.

- When strategic information security and compliance expertise is needed to help win deals, but there are no annual audit requirements to fulfil
- If you need to elevate information security from an ad-hoc component of IT to a dedicated element of the organisations risk management strategy.

## vCISO services for: SMB's

Helping to shape early stage policies that will influence the organisations' future appetite of risk and security culture.

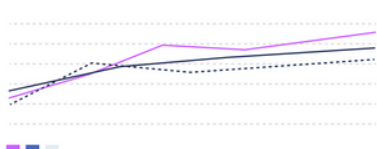

- Invaluable guidance in setting up early-stage security programs that balance operational and commercial efficiencies.
- Build internal capabilities aligned to key standards and frameworks through knowledge transfer, training programs, and mentorship of staff.
- Consideration to growing supply chains and how to manage the risks that can bring.

## vCISO services for: Mid-market organisations

Scale processes and gain continuous visibility across your SecOps, compliance, third-party risk, and human risk management programs.

- Significant cost savings can be achieved if mid-market organisations are still manually managing multiple audits and frameworks. Automation and real-time visibility becomes essential to remain competitive, secure, and compliant.
- At this level a board level voice for cybersecurity matters is essential.
